

Academic Year/course: 2021/22

27245 - Internships

Syllabus Information

Academic Year: 2021/22

Subject: 27245 - Prácticas externas

Faculty / School: 100 - Facultad de Ciencias

Degree: 452 - Degree in Chemistry

ECTS: 5.0

Year: 4

Semester: Second semester

Subject Type: Optional

Module:

1. General information

1.2. Context and importance of this course in the degree

External academic practices constitute an activity of a formative nature carried out by university students and supervised by universities, whose objective is to allow them to apply and complement the knowledge acquired in their academic training, favoring the acquisition of skills that prepare them for the exercise of professional activities, facilitate their employability and promote their entrepreneurial capacity.

The external internships of the Chemistry degree have an extracurricular nature, that is, they are not part of the Study Plan, so they are optional. They may be validated for free choice credits (up to 5 ECTS, depending on the number of hours completed) and will appear in the corresponding SET.

The Chemistry degree allows the development of professional activities in a very extensive field, from industry, quality control, chemical analysis, consulting, management, commerce, teaching, research, etc. both in the public and private spheres.

2. Learning goals

3. Assessment (1st and 2nd call)

4. Methodology, learning tasks, syllabus and resources

4.4. Course planning and calendar

The timetables for carrying out the internships will be established in accordance with their characteristics and the availability of the collaborating entity. It will be endeavored that the schedules are compatible, where appropriate, with the academic, training and representation activity and participation developed by the student at the university.

4.5. Bibliography and recommended resources

There are no bibliographic records for this subject.
